Description

When I try to enlarge the box corresponding to the movie name, the 'Save' button and the delete button “x” are

Preconditions:

- The customer should be logged into the website.

Steps to reproduce:

- Acces the Tmdb homepage
- Click the account icon from the top right corner of the page
- Select and click on Lists
- Click on one list
- Click on the Edit button from the top left corner of the page, under the list name
- Click on Add/Edit items
- Enlarge the comment field.

Expected results: The save button and the delete button should properly align.

Actual results: The save button and the delete movie button from the Add item page are not properly aligned.

Description

After creating the list with unlimited random characters in the name, I exited the page and returned to the page.

Now, when i want to acces the list with the unlimited random characters in the name, I am redirected to a page.

Preconditions:

- The customer should be logged into the website.

Steps to reproduce:

- Acces the Tmdb homepage
- Click the account icon from the top right corner of the page
- Select and click on Lists
- Click on the list with unlimited charcaters in the name

Expected results: The customer should be redirected to the list page

Actual results: The customer is redirected to a page with the following error : 502 Bad Gateway openresty.

Description

Preconditions:

The customer should be logged into the website.

Steps to reproduce:

- Acces the Tmdb homepage
- Click the account icon from the top right corner of the page
- Select and click on Lists
- Click on the Create List button from the right of the page
- Write the list details
- Fill in the description field with unlimited text

Expected results: The customer should not be able to fill in the name field with unlimited random characters and an error message should be returned into the website.

Actual results: The name list is created and a success message is displayed on the web page, redirecting the customer to the next page (Add item).

Description

Users should be able to easily access and review these documents before agreeing to them.

It would be ideal to have a link in this sentence “By clicking the "Sign up" button below, I certify that I have privacy policy” to easily access them.

Description

If I enter an email when resetting the password, and I don't have an account, it still sends me reset instructions.

Would be ideal to recognize emails and return an error stating that the email is not in the database and there is no account associated with it on this website.

[PTDB-21] [The password requires just a minimum of 4 characters when creating an account, which is very vulnerable](#) Created: 02/Feb/24 Updated: 27/Feb/24

	relates to	PTDB-10 Customer should not be able to create...	Backlog
	relates to	PTDB-2 Create user account in TMDB	Backlog

Description

Preconditions: N/A

Steps to reproduce:

- Login into the TMDB website application
- Click on the Join TMDB (Sign up) button on the top-right corner of the page
- Insert only the special charactes “@” and “#” on the username, valid data to password and email and press Sign up button

Expected results: The account should not be created and an error message should be returned to the webpage

Actual results: The account is created and a success message is displayed on the web page saying that you should activate the account from the email received in order to login.
